ACKNOWLEDGEMENT

First and foremost, I would like to thank God Almighty for giving me the strength ,knowledge, ability and opportunity to undertake this academic study and to persevere and complete the project work satisfactorily.

I would like to express my gratitude to our respected Principal Dr.A Sarathy, V. H. N. Senthikumara Nadar College(Autonomous),Virudhunagar for his support and blessings to accomplish the project.

I then wish to convey my sincere thanks to our Self Finance Coordinator Dr. A. Kalidass for his support in carrying out his study and I would also like to thank our Head of the Department Dr. J. Vimal Priyan of the Department of Commerce (CA) SF, V. H. N. Senthikumara Nadar College (Autonomous), Virudhunagar, for his constant resource and continuous encouragement.

I owe my deep gratitude to my project guide MS,Shunmathy V, Assistant Professor of Commerce,V.H.N.Senthikumara Nadar College (Autonomous), Virudhunagar for the continuous support of my study and relate research, for his patience, motivation, and immense knowledge.His guidance helped me in all the time of research and writing of this project report.

I take this opportunity to express my gratitude to all the Department faculty members for their help and support.

I must express my very profound gratitude to my parents for providing me with unfailing support and continuous encouragement throughout my years of study and through the process of researching and writing this thesis. This accomplishment would not have been possible without them.

Finally, I wish to extend my sincere thanks to my fellow researchers for their love and encouragement without them whom the project wouldn't have been a reality.

P. VISHNU (21SUCC094)

CHAPTER 1

INTRODUCTION AND DESIGN OF STUDY

1.1 INTRODUCTION

Nowadays the trend of having smartphone has taken place at the great extent. Each and every consumer is looking for various brands of smartphone in order to analyze and compare which would be more compatible in terms of design, quality, pricing, advance technology etc. Apple is the type of company which understands what the customers actually prefer and also the future aspects of the innovation in such a manner that no other company thinks to do. There are various other models of smartphones such as Samsung, Redmi, Oppo which are also fulfilling the expectation of customer base and are mostly preferred by the medium income section of customer base. In the recent years it was shown that 65-70% of the world's population own at least one smartphone. In Today's Scenario most of the consumers are looking towards buying more technological and advanced smartphone. Therefore, the consumers belonging to higher or medium income group are preferring a reliable smart phone for their long-term usage maybe their preference would be different regarding choosing of models depending on pricing structure. As Apple costs premium pricing than other smart phones therefore only higher section of the society thinks about purchasing iPhone rest of the consumers who can't afford premium pricing go towards Samsung, Redmi etc. Samsung is also one of the trusted and loyal smart phones preferred by one third of the population because of its long-term durability. India has the fastest-growing smartphone market in the world, everybody looks India as a huge landing ground for their innovation therefore the Indian market has huge competition and thus its necessary to understand the customer perception in order to satisfy their requirements in long run. Customer satisfaction plays a crucial factor in terms of finding whether the customer is preferring the particular model of smartphone or switching towards other models due to some gaps which can be battery issues, network issues etc. Therefore, to overcome this issue various companies are taking the feedback in order to keep their customer base retained for longer time period.

1.2 COMPANY PROFILE

1.2.1 APPLE

Apple Inc (Apple) designs, manufactures, and markets smartphones, tablets, personal computers, and wearable devices. The company offers software applications and related services, accessories, and third-party digital content. Apple's product portfolio includes iPhone, iPad, Mac, iPod, Apple Watch, and Apple TV. It also provides advertising services, payment services, cloud services, and various consumer and professional software applications such as iOS, macOS, iPadOS, watchOS, iCloud, AppleCare, and Apple Pay. Apple sells and delivers digital content and applications through the App Store, Apple Arcade, Apple News+, Apple Fitness+, Apple Card, Apple TV+, and Apple Music. The company's business operations span the Americas, Europe, the Middle East, Africa, and Asia-Pacific. Apple is headquartered in Cupertino, California, the US.

1.2.2 SAMSUNG

Samsung was founded as a grocery trading store on March 1, 1938, by Lee Byung-Chull. He started his business in Taegu, Korea, trading noodles and other goods produced in and around the city and exporting them to China and its provinces. (The company name, Samsung, came from the Korean for “three stars.”) After the Korean War, Lee expanded his business into textiles and opened the largest woolen mill in Korea. He focused heavily on industrialization with the goal of helping his country redevelop itself after the war. During that period his business benefited from the new protectionist policies adopted by the Korean government, whose aim was to help large domestic conglomerates (chaebol) by shielding them from competition and providing them easy financing. In the late 1950s the company acquired three of Korea’s largest commercial banks as well as an insurance company and firms that made cement and fertilizer. Samsung in the 1960s acquired more insurance companies as well as an oil refinery, a nylon company, and a department store.

During the 1970s the company expanded its textile-manufacturing processes to cover the full line of production—from raw materials all the way to the end product—to better compete in the textile industry. New subsidiaries such as Samsung Heavy Industries, Samsung Shipbuilding, and Samsung Precision Company (Samsung Techwin) were established. Also, during the same period, the company started to invest in the heavy, chemical, and petrochemical industries, providing the company a promising growth path.

1.2.3 REDMI

Xiaomi Corporation was founded in April 2010 and listed on the Main Board of the Hong Kong Stock Exchange on July 9, 2018 (1810.HK). Xiaomi is a consumer electronics and smart manufacturing company with smartphones and smart hardware connected by an IoT platform at its core.

With an equal emphasis on innovation and quality, Xiaomi continuously pursues high-quality user experience and operational efficiency. The company relentlessly builds amazing products with honest prices to let everyone in the world enjoy a better life through innovative technology.

As of the second quarter of 2023, Xiaomi ranked among the top 3 in the global smartphone market, in terms of smartphone shipments, according to Canalys. The company has also established the world's leading consumer AIoT (AI+IoT) platform, with 655 million smart devices connected to its platform, excluding smartphones, tablets and laptops, as of June 30, 2023. Xiaomi products are present in more than 100 countries and regions around the world. In August 2023, the company listed as Fortune Global 500 for the 5th consecutive year.

Xiaomi is a constituent of the Hang Seng Index, Hang Seng China Enterprises Index, Hang Seng TECH Index and Hang Seng China 50 Index.

1.2.4 ONEPLUS

OnePlus was created by two persons by the names of Pete Lau and Carl Pei in 2013. Whereas Lau was a previous vice president of Oppo, which is currently a rival of OnePlus, Carl Pei was a computer programmer by profession. To begin with, the two co-founders and the whole OnePlus organization set out to create a phone that "balanced high-end quality with an affordable pricing that was comparable to that of other phones in its class." Of course, their phrase, "Never Settle," now embodies this mindset perfectly.

Fig. 1.1. OnePlus

The concept of "Never Settle" as an idea stem from the belief that customers should not be forced to use a subpar phone just because they do not have a large enough budget to get a better one.

The Philosophy Behind OnePlus was founded in August 2013 as a result of a casual coffee-table discussion amongst a group of early workers who were, at the time, just acquaintances. As we sat with our phones on the table, we saw that almost everyone was using an iPhone. The fact that this happened was unexpected since several of us were working for other smartphone makers who were also manufacturing Android

phones at the time. Consequently, we questioned ourselves, "Why are all of the folks at this table using their iPhones?"

"We will produce a product that is more visually appealing and of greater quality," Lau explains. The fact that we are different does not mean that we would do anything only for the purpose of being different. Everything that is done must be geared toward improving the real user experience in everyday situations. "We're both simply looking to provide the greatest product possible, no matter what."

1.2.5 VIVO

Vivo is a Chinese multinational manufacturer of smartphones headquartered in Dongguan, Guangdong province, China. Founded in 1995, vivo entered the telecommunication and consumer electronics industry with landline phones and wireless phones. From 2011, vivo started its smartphone business. As of 2014, vivo releases and markets its smartphones under the vivo brand, ranking as the 5th top smartphone brand in China, and 10th top smartphone brand globally.

In 2014, vivo sold 25 million units in mainland China, in 2015, the sales volume would reach 45 million worldwide, with an average retail price of \$300. The annual production capacity is 60 million units. Vivo is now among the top five most profitable smartphone brands in China.

Currently 20,000 operators work in vivo, and 3,000 engineers are in four R&D centers in Dongguan, Shenzhen, Nanjing and Chongqing. From hardware design and manufacture, to software development (Android based Funtouch OS), vivo has built a complete and sustainable

ecosystem. With the creativity and technology, vivo keeps innovating. In 2012, vivo created the X1, the first Smartphone to incorporate a Hi-Fi chip, resulting in an unparalleled audio experience. Pioneering this technology, it has been included in all vivo smartphones ever since. From then on, the innovation never stops:

- • 2012, Xplay, world's first Hi-Fi smartphone integrated with OPA2604 amplifying power
- • 2013, vivo X3, world's first Hi-Fi smartphone integrated with ES9018 decoding chip
- • 2013, Xplay3s, world's first 2K display Hi-Fi music smartphone with extreme display performance
- • 2014, X5Max, world's slimmest smartphone with a totally new framework of Hi-Fi 2.0

From 2011, vivo has been certified in over 100 countries and regions worldwide, choosing the path of internationalization and moved on. Currently vivo has presence in India, Malaysia, Indonesia, Thailand, Myanmar, Vietnam and Philippines. Vivo entered India in Dec., 2014. In a short time span vivo has established itself as a Hi-fi & Smart brand. Currently vivo is serving Indian customers with 8,000 employees and 10,000 retailers, in over 300 cities in 22 states, with a strong focus on Hi-Fi Music. By the end of 2016, vivo will also have established more than 200 exclusive after-sales

1.2.6 OPPO

OPPO Company was founded in 2004 and launched its DVD products in Europe and the United States in the same year. In 2008, OPPO launched its first mobile phone -- OPPO A103 "Smiley Face" and officially entered the mobile phone industry. OPPO continues to show goodwill in science and technology and the attitude "Inspiration Ahead" with all users. The founding team of OPPO has extensive experience in electronic industry. When the team

left BBK Company and founded the new completely independent brand - OPPO, they adhered to the belief of creating great products. In the fierce competing market, OPPO gradually became one of the Top-5 mobile phone brands in the world and emerged in the IoT products. Today, OPPO produces mobile phones (including Reno series), headphones, watches, tablets and other smart devices. OPPO also developed Color OS operating system. With an innovative, open and elegant software-hardware integrated experience, OPPO is committed to creating a beautiful and intelligent life for users all over the world.

Brand Milestones

OPPO has been cultivating its capabilities for nearly 20 years and gone through three transformations spanning four different eras.

1.2.7 REALME

Realme Company is a China-based company that manufactures mobile phones. Sky Li founded it, and he was Vice- President of Oppo. This Company came into existence on 4 May 2018. The parent company is BBK Electronics. This Company was started with the name called Oppo Real. The Company launched its first product in May 2018, called Realme 1. Sky Li quit Oppo and decided to launch its own Company under the

banner called Sina Weibo. Later, Realme made its own logo. Realme sales started growing rapidly and made a strong grip on the Indian market. Realme Phone surpassed the sale of its former Company, Oppo. It was able to establish itself as a brand in the Indian market, leaving behind telecommunications giants like Vivo, Xiaomi, and Samsung. It is interesting to note that Sky Company is known for the fast charging of mobile phones. Realme is a company categorized under Company limited by shares and Private offering manufacture of radio, communication equipment, and apparatus as principal activity.

1.3 SCOPE OF STUDY

The scope of the study is to find out the customer satisfaction towards Mobile usage. This study covers the various aspects of customer satisfaction.

1.4 OBJECTIVES OF THE STUDY

- To study the socio-economic characteristics of the sample respondents.
- To analyze the factors influenced while purchasing mobile phones.
- To analyze the customer satisfaction level towards usage of mobile phones.
- To explore the problems faced by the customers in usage of mobile phones.
- To offer solution regarding the problems faced by the customers in usage of mobile phones.

1.5 RESEARCH DESIGN AND METHODOLOGY

In view of considerable data-from survey research as well as secondary sources-collected and presented in this research report, 'Descriptive Research' is considered the most appropriate for the present study. The research problem is identified in this context; framing of the questionnaire and the evaluation of the data collected have been designed accordingly. The suggestions of the study emerge from the inferences drawn from the sample survey of Mobile Usage customers in Virudhunagar.

1.6 PRIMARY DATA

The present study is an empirical one based on survey method. First-hand data are collected from the fields through questionnaire and observation. A well-structured questionnaire has been prepared in consultation with the research guide.

The questionnaire has been used for collecting the required data for the Mobile Usage. Data relating to the customer satisfaction towards Mobile Usage in Virudhunagar are gathered through questionnaire.

1.7 SECONDARY DATA

Secondary data are also collected for this study. Apart from the primary data and the secondary data for the present study was collected from standard text books of related topics, leading journals, published documents and sources from internet.

1.8 SAMPLING DESIGN

Since the total number of online customers in Virudhunagar is not available the survey envisaged the application of convenient sampling technique. A sample of 50 respondents was selected from the universe for this study. Care was taking to give approximately equal representation to the all respondents in all places of the study area.

1.9 FIELD WORK AND COLLECTION OF DATA

Field work for the present study was carried on personally by the researcher herself. The survey was conducted in several stages covering a period of a months. The opinions and suggestions of the respondents on the topic under discussions were also elicited and recorded at the end of the questionnaire. The completed questionnaires were checked immediately on the spot in order to avoid revisits.

1.10 DATA PROCESSING

After collecting the filled-in questionnaire, editing the data was further processed, the data were computerized.

1.11 STATISTICAL TOOLS USED

The collected data are presented in the form of tables and diagrams and they are analyzed with the help of simple percentage analysis.

1.12 PROFILE OF THE STUDY AREA

Virudhunagar is a town and the administrative headquarters of the [Virudhunagar district](#) in the [South Indian state](#) of [Tamil Nadu](#). Virudhunagar emerged as an important trade centre during the [British rule](#). It was formerly known as Virudhupatti. Tamil is the official language spoken by majority of people in and around Virudhunagar.

1.13 LIMITATIONS OF THE STUDY

Every research study suffers from errors and limitations. Some errors are inherent in the research design while some others become part of study during various stages of the operations. The present study is subject to the following constraints and limitations.

- The present study is limited its scope to Virudhunagar only. Hence the findings of the study may not be generalized to the big cities at the national level.
- Due to time constraint, the number of respondents was limited.
- There are chances of personal bias in convenient sampling technique used in this study. It may influence the findings of the study.
- As this study is a descriptive one, it has not analyzed the problem in depth by testing on experimental bias.

1.14 SCHEME OF THE RESEARCH REPORT

The present study entitled “A STUDY ON CUSTOMER SATISFACTION TOWARDS MOBILE USAGE IN VIRUDHNAGAR” has been organized into five chapters. The present chapter identifies and states the problems of the study in relation to online shopping in Virudhunagar. It also deals with research design including objectives of the study, scope of the study, methodology and tools employed, construction of questionnaire, sampling design, data processing and frame work of analysis and the organization of the report.

Chapter I titled “INTRODUCTION AND DESIGN OF THE STUDY” presents the

introduction and methodology of the study.

Chapter II entitled “REVIEW OF LITERATURE” presents the review of literature in mobile usage.

Chapter III titled “PROFILE OF MOBILE USAGE USERS” presents a vivid picture of the socio economic and geographic aspect of the sample respondents to have a clear understanding of their background.

Chapter IV christened “SATISFACTION TOWARDS MOBILE USAGE” deals with satisfaction of respondents with regard to reason for purchase, usage, opinion, level of satisfaction, problems faced and various factors relating to mobile usage.

Chapter V titled “SUMMARY OF FINDINGS, SUGGESTIONS AND CONCLUSION” brings the research report to a logical conclusion by highlighting the summary of the survey findings with a view to obtaining answers to the questions raised in the statement of the research problem and providing valuable suggestions for the development of mobile usage.

CHAPTER – 2

REVIEW OF LITERATURE

2.1 INTRODUCTION

A brief literature would be of immense help to the researcher in gaining insight into selected problem. The researcher would gain good background knowledge of the problem by reviewing certain studies. A reference to these entire studies will be related in the context of the shaping the present study. There are very limited studies, which are directly relevant to the study concerned. They have been taken from journals, articles, PhD thesis and unpublished research work.

- **Shakir Hafeez; SAF Hasnu (2010)** states that Customer satisfaction is a crucial element for the success of all businesses. One of the biggest challenges for a market is how to satisfy and retain the customers. This study is based on Mobilink's prepaid customers. The findings suggest that overall customer satisfaction and customer loyalty is comparatively low among the customers of Mobilink. The Customer loyalty in Pakistan's mobile sector is relatively low because it is an emerging industry, new players are entering in this market and customers are more fascinated to try the new service providers. However, it is expected that when the industry will be well established, the results will be more comparable to other studies.

- **G. Kandus (2011)** correlated the brand of mobile phone to users' security practices. Users show different behavior in an array of characteristics, according to the brand of the mobile phone they are using. As such, there is a categorization of areas, different for each brand, where users are clearly lacking security mind, possibly due to lack of awareness. Such a categorization can help phone manufacturers enhance their mobile phones in regards to security, preferably transparently for the user.

- **Tajzadeh Namin Aidin (2012)** analyzed that the process of deciding over (choosing) a brand may be influenced by situation and content. The findings suggest a significant relationship between the variables "brand attitude", "corporate attitude", and "product

- (cell phone) choice”. In addition, no significant relationship was found between individual decision-making processes (independent or mediated) and product choice

- **Nasr Azad; Maryam Safaei (2012)** had presented an empirical study to investigate the effects of different marketing efforts on brand equity in mobile industry. The results show that there is a positive and meaningful relationship between marketing mix efforts and brand equity. In other words, more advertisements could help better market exposure, which means customers will have more awareness on market characteristics. Among all mixed efforts, guarantee influences more on brand equity, which means consumers care more on product services than other features. Finally, among different characteristics of brand equity, product exclusiveness plays an important role. In other words, people are interested in having exclusive product, which is different from others.

- **Maryam Safaei (2012)** states that there are many evidences to believe that customers select their products based on brand name. Products also maintain their own characteristics, which make them differentiable from others. In this paper, researchers have presented an empirical study to determine important factors influencing customers' purchasing intend for cellular phones in capital city of Iran, Tehran. The results of the study show that there are some positive relationships 6 between exclusive name and quality perception, between exclusive name and word of mouth advertisement, between quality perception and fidelity, between word-of-mouth advertisement and brand name and between brand name image and brand name.

- **Vipan Bansal and Bindu Bansal (2013)** “Have studied the Customer satisfaction of mobile phone service users operating in Malwa Punjab” This paper is used to trace the reason for purchasing mobile phones and usages of mobile phone applications. This study revealed that SMS is the most widely used Valued Added Service. The results revealed that most of the respondents were satisfied with their current service provider show maximum willingness for shifting to Airtel.

- **Dr. T. N. R. kavitha and Mr. R. Mohana Sundaram (2014)** their study entitled “A Study on Customer Satisfaction towards Samsung Mobile Phone in Erode City”. This paper carried out with an objective to determine the consumer preference and satisfaction. This paper concentrated on one particular mobile phone brand called Samsung and its price, quality, colour, and satisfaction level.

- **Dr. L. Venkatesan, “Buyer preference towards Mobile phones in selected areas in Chennai – A study” RRDM Vol-3 Issue II November 2018. ISSN 2455 3085.** The Scope of this studies the customers using Mobile Phones to find the level of their first choice, perception and satisfaction. It was collected with the aid of formal structured interview schedule, with personal face-to-face interaction. The schedule covers personal data, economic conditions, and satisfaction towards charges and services suggestions from the consumers.

- **Nidhi P. Shah (2013) “Customer Satisfaction of Samsung Mobile Handset Users”** has said that the main aim of this research paper is to find customers satisfactions with relations to some variables like individual features, price, brand name etc. Study indicates an average satisfaction of customers towards mobile handset users of Samsung.

- **Abdalla Nayef Al-Refai and Nor Azila Bt Mohd Noor (2014)** in their article entitled, “**The Influence of the Trust on Customer Satisfaction in Mobile Phone Market: An Empirical Investigation of mobile phone Market**” have focused on the impact of trust on customer Satisfaction in mobile phone sector. The findings of the study have substantiated the significant impact of trust on customer satisfaction in mobile phone market.

CHAPTER 3

PROFILE OF MOBILE USAGE USERS

3.1 INTRODUCTION

The present chapter gives a bird's eye-view of the sample surveyed regarding their Age, gender, marital status, educational qualification, occupation, the annual income and their Place and residence

TABLE 3.2 GENDER OF THE RESPONDENTS

S.NO	Particulars	No of respondents	Percentage
1	Male	27	54
2	Female	23	46
Total		50	100

Source: (Primary data)

It is inferred from the above table that 54% of the respondents are male and 46% of the respondents are female.

Majority (54%) of the respondents are male

FIGURE 3.2

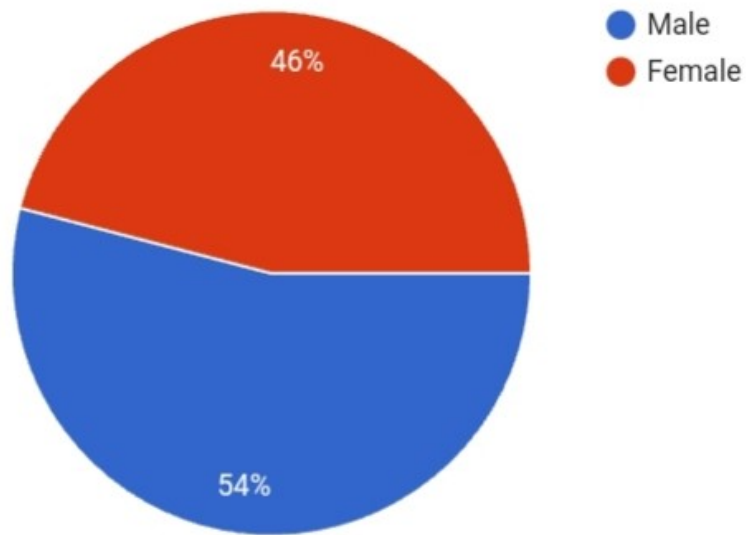

Table 3.3 Marital status

S.NO	Particulars	No of respondents	Percentage
1	Married	25	50%
2	Unmarried	25	50%
Total		50	100%

It is inferred from the above table that 50% of the respondents are married and 50% of the respondents are unmarried.

Majority (50%) of the respondents are married and unmarried.

FIGURE 3.3

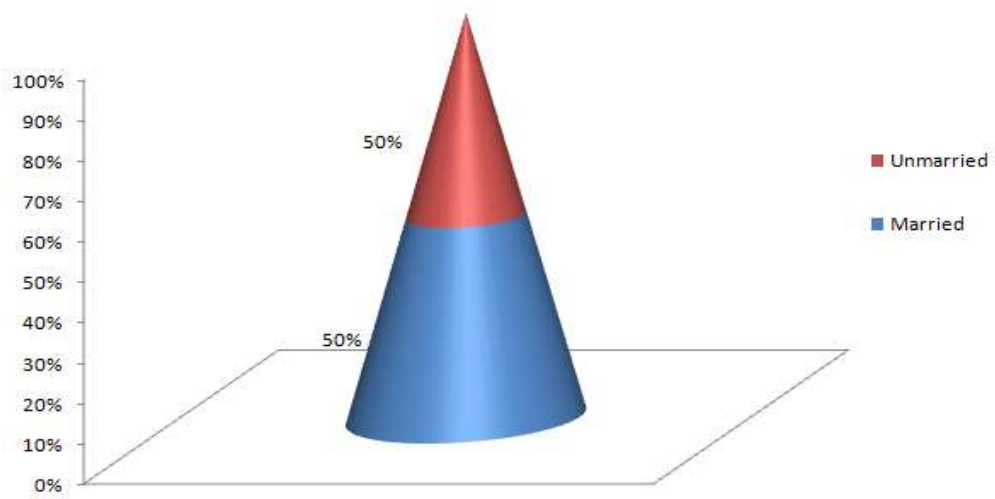

Table 3.4 AGE OF THE RESPONDENT

S.NO	Particulars	No of respondents	Percentage
1	Below 20	13	26%
2	Between 20-35	20	40%
3	Between 35-45	17	34%
4	Above45	0	0%
Total		50	100%

It is inferred from the above table that 26% of the respondents are Below 20 and 40% of the respondents are Between 20-35 and 34% of the respondents are Between 35-45..

Majority (40%) of the respondents are Between 20-25

FIGURE 3.4

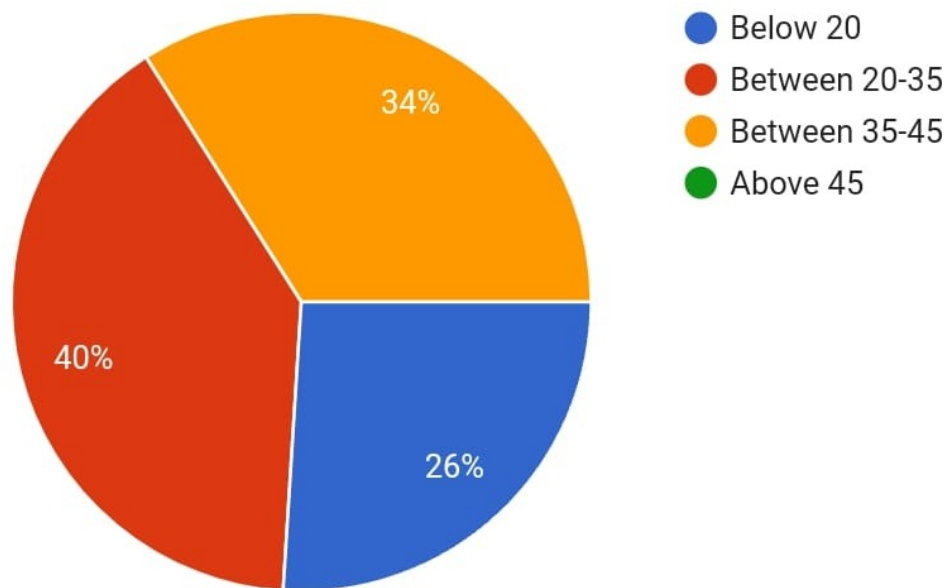

Table 3.5 EDUCATION QUALIFICATION

S.NO	Particulars	No of Respondents	Percentage
1	SSLC	1	2%
2	HSS	7	14%
3	UG	14	28%
4	PG	17	34%
5	OTHERS	11	22%
TOTAL		50	100%

It is inferred from the above table that 2% of the respondents are SSLC and 14% of the respondents are HSS and 28% of the respondents are UG and 34% of the respondents are PG 22% of the respondents are others.

Majority (34%) of the respondents are PG

FIGURE 3.5

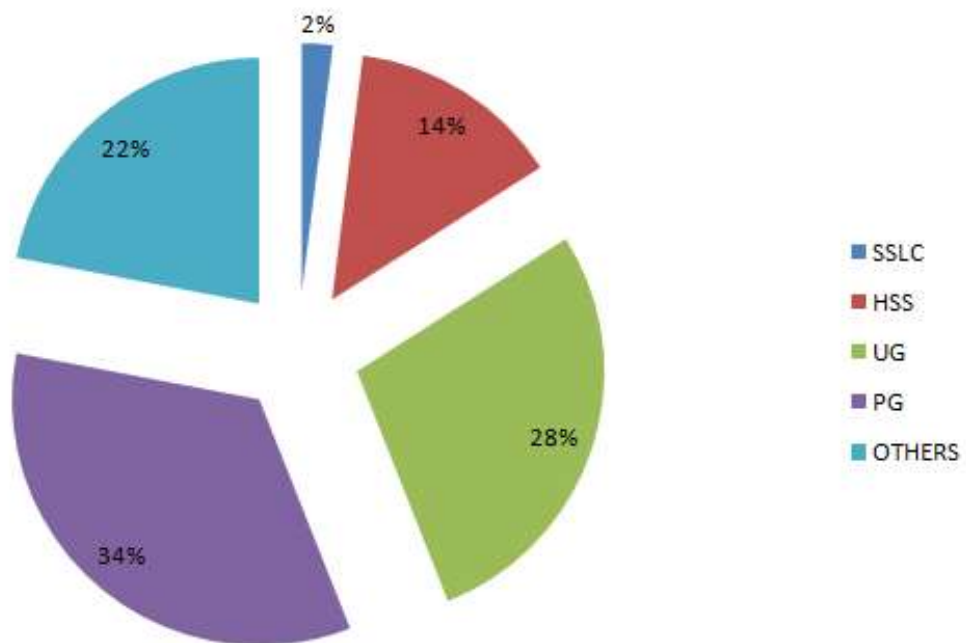

TABLE 3.6 INCOME LEVEL

S.NO	Particulars	No of Respondents	Percentage
1	Below 10000	5	10%
2	Rs 10000-30000	5	10%
3	Rs 30000-40000	13	26%
4	Above -40000	9	18%
5	Others	18	36%
Total		50	100%

It is inferred from the above table that 10% of the respondents are Below 10000 and 10% of the respondents are RS 10000-30000 and 26% of the respondents are RS 30000-40000 and 18% of the respondents are Above-40000 36% of the respondents are others

Majority (36%) of the respondents are others

CHAPTER - V

**SUMMARY OF FINDINGS, SUGGESTIONS
AND CONCLUSION**

5.1 INTRODUCTION

Present venture titled “A study of customer satisfaction towards Mobile usage in Virudhunagar” is undertaken to examine the customer satisfaction towards Mobile usage.

The investigation encompassed with an extensive survey to obtain primary data from a sample of 50 respondents, were customers of Mobile usage. The questionnaire covers all the aspects of Mobile usage.

The primary data were gathered from the survey using structured schedules and questionnaires, which have been statistically analyzed and presented in the form of frequency tables. Simple statistical tools like percentage (%) analysis are also used. As a prelude to the nature of the respondents, a general appraisal of the sample respondents has also been presented. The study, it is hoped will prove be a worthwhile experiment as evident from the following summary of findings, given or stated briefly with a view to obtaining answers on the lines of the study were framed. To recapitulate, the research problem and objectives of the study are as follows:

5.2 OBJECTIVES OF THE STUDY

- To study the socio-economic characteristics of the sample respondents.
- To analyze the factors influenced while purchasing mobile phones.
- To analyze the customer satisfaction level towards usage of mobile phones.
- To explore the problems faced by the customers in usage of mobile phones.
- To offer solution regarding the problems faced by the customers in usage of mobile phones.

This chapter list out the finding from the analysis .The listen defining helped in arrived at certain inferences.

5.3 FINDINGS

- Majority (54%) of the respondents are male

- Majority (50%) of the respondents are married
- Majority (40%) of the respondents are Between 20-35
- Majority (34%) of the respondents are PG
- Majority (36%) of the respondents are others
- Majority (38%) of the respondents are others
- Majority (22%) of the respondents are used to apple branded mobile phone
- Majority (36%) of the respondents are used to 2-3 years
- Majority (72%) of the respondents to download files
- Majority (76%) of the respondents used to news paper
- Majority (44%) of the respondents used to 2 years
- Majority (40%) of the respondents are postpone your purchase
- Majority (38%) of the respondents used mobile phone below 2hours.
- Majority (40%) of the respondents used to study purpose
- Majority (44%) of the respondents are Rs 100-200
- Majority (38%) of the respondents are used to Jio operator
- Majority (80%) of the respondents are good network coverage
- Majority (84%) of the respondents are yes
- Majority (76%) of the respondents are overheating
- Majority (46%) of the respondents are yes
- Majority (38%) of the respondents are used to social media addiction

5.3 SUGGESTION

- ❖ Make new features are good for mobile
- ❖ Improve better health that so good for mobile
- ❖ Improve to society
- ❖ Using to study purpose
- ❖ Using work from homes Sometimes network are very low
- ❖ Add extra features to so good I like my mobile
- ❖ Use carefully its improve your knowledge
- ❖ Children use only study purpose not use anything
- ❖ Gain my knowledge
- ❖ Mobile are perfectly working for only one year next year very lack and heating
- ❖ Very usefull to the generation

5.4 CONCLUSION

.

QUESTIONS

QUESTIONNAIRE (Google Form)

A STUDY OF CUSTOMER SATISFACTION TOWARDS MOBILE USAGE IN VIRUDHUNAGAR

1. Name: _____

2. Gender:

A. Male [] B. Female []

3. Marital status:

A. Married [] B. UnMarried []

4. Age:

A. Below 20 [] B. Between 20-35 [] C. Between 35-45 [] D. Above 45 []

5. Education qualification:

A. SSLC [] B. HSC [] C. UG [] D. PG [] E. Others []

6. Income Level:

A. Below Rs 10000 [] B. Rs 10000 – 30000 [] C. Rs 30000 – 40000 []

D. Above -40000 [] E. Others []

7. Occupation :

A. Govt employee [] B. Private employee [] C. Professional [] D. self employed []

E. Others []

8. Which brand of mobile do you use:

A. Samsung [] B. Apple [] C. Redmi [] D. Vivo [] E. One plus [] F. Oppo []

G. Realme [] H. Others []

9. How often you are using mobile phone:

A. Less then 1 year [] B. 1 - 2years [] C. 2 - 3 years [] D. Above 3 years []

10. What are the reasons for using this mobile :

A. WAP [] B. Just to talk on it [] C. Use GPRS function [] D. Receive email & sms []

E. Download files [] F. Gaming [] G. Movies[] H. Camera[] I. Processor[]

J. Battery capacity [] K. Others []

11. Which type of media influence you to purchase mobile phone:

A. Television [] B. Newspaper [] C. Youtube [] D. Pamphlets [] E. Notice []

F. Others []

12. How frequently do you purchase mobile phones:

A. Once in 6months [] B. Yearly [] C. 2 years [] D. Above 3 years []

13. If your preferred brand is not available for purchases what will you do:

A. Postpone your purchase [] B. Switchover other brand [] C. Go to other showroom []

14. What are the factory influence you to purchase a mobile phone:

Factors	Highly Satisfied	Satisfied	Neutral	Dissatisfied	Highly Satisfied
Price					
Brand					
Color					
Shape					
Design					
Features					
Users Friendly					
Family&Friends					

15. How much time do you spend on your mobile phone (in one Day) :

A. Below 30 min [] B. Below 2 hours [] C. Below 4 hours [] D. Above 4 hours []

16. What do you preference to use when using Internet on your mobile phone:

A. Entertainment [] B. Study [] C. Business [] D. Improve your knowledge []

17. How much money do you spend on your mobile Service per month:

A. Below Rs 100 [] B. Rs 100-200 [] C. Rs 200-400 [] D. Above 400 []

18. which mobile operator do yo use:

A. Airtel [] B. Jio [] C. BSNL [] D. others []

19. Why did you Choose this provider:

A. Good Network coverage [] B. Brand Image [] C. Innovative tariff plans []
D. Customer Service []

20. What is your Satisfaction level of to Smartphone:

Factors	Highly Satisfied	Satisfied	Netural	Dissatisfied	Highly Dissatisfied
User Friendly					
Picture And Sound Quality Is Clear					
Good Singal Strength					
Long Battery Life					
Best Promotional Offers					
Good Screen Clarity					
Internet Access Speed					
Wifi Connectivity					
Bluetooth Operation					
Memory Capacity					

21. Do you face any problem in mobile phone?

A. Yes [] B. No [] C. Maybe []

22. If yes, what are the problems you are facing in using mobile phone:

A. Short battery life [] B. Overheating [] C. Lack of storage space [] D. water Damage []

E. Blurry camera [] F. Faulty charging port [] G. Crashes frequently []

H. Hardware defects [] I. Others []

23. Have you ever thought about negative effects of mobile phones :

A. Yes [] B. No [] C. Maybe []

24. If yes, what are the negative effects of mobile phone:

A. Information Theft [] B. Social media addiction [] C. Weak eyesight [] D. Others []

25. Any suggestions:
